

Paradigm Shift

from a *Sustainability Model*
to *Resilience Model*

from epa.gov

from nasa.gov

Sustainability Model

Nature is something we are separate from. We need to remove or stop our interference in natural systems.

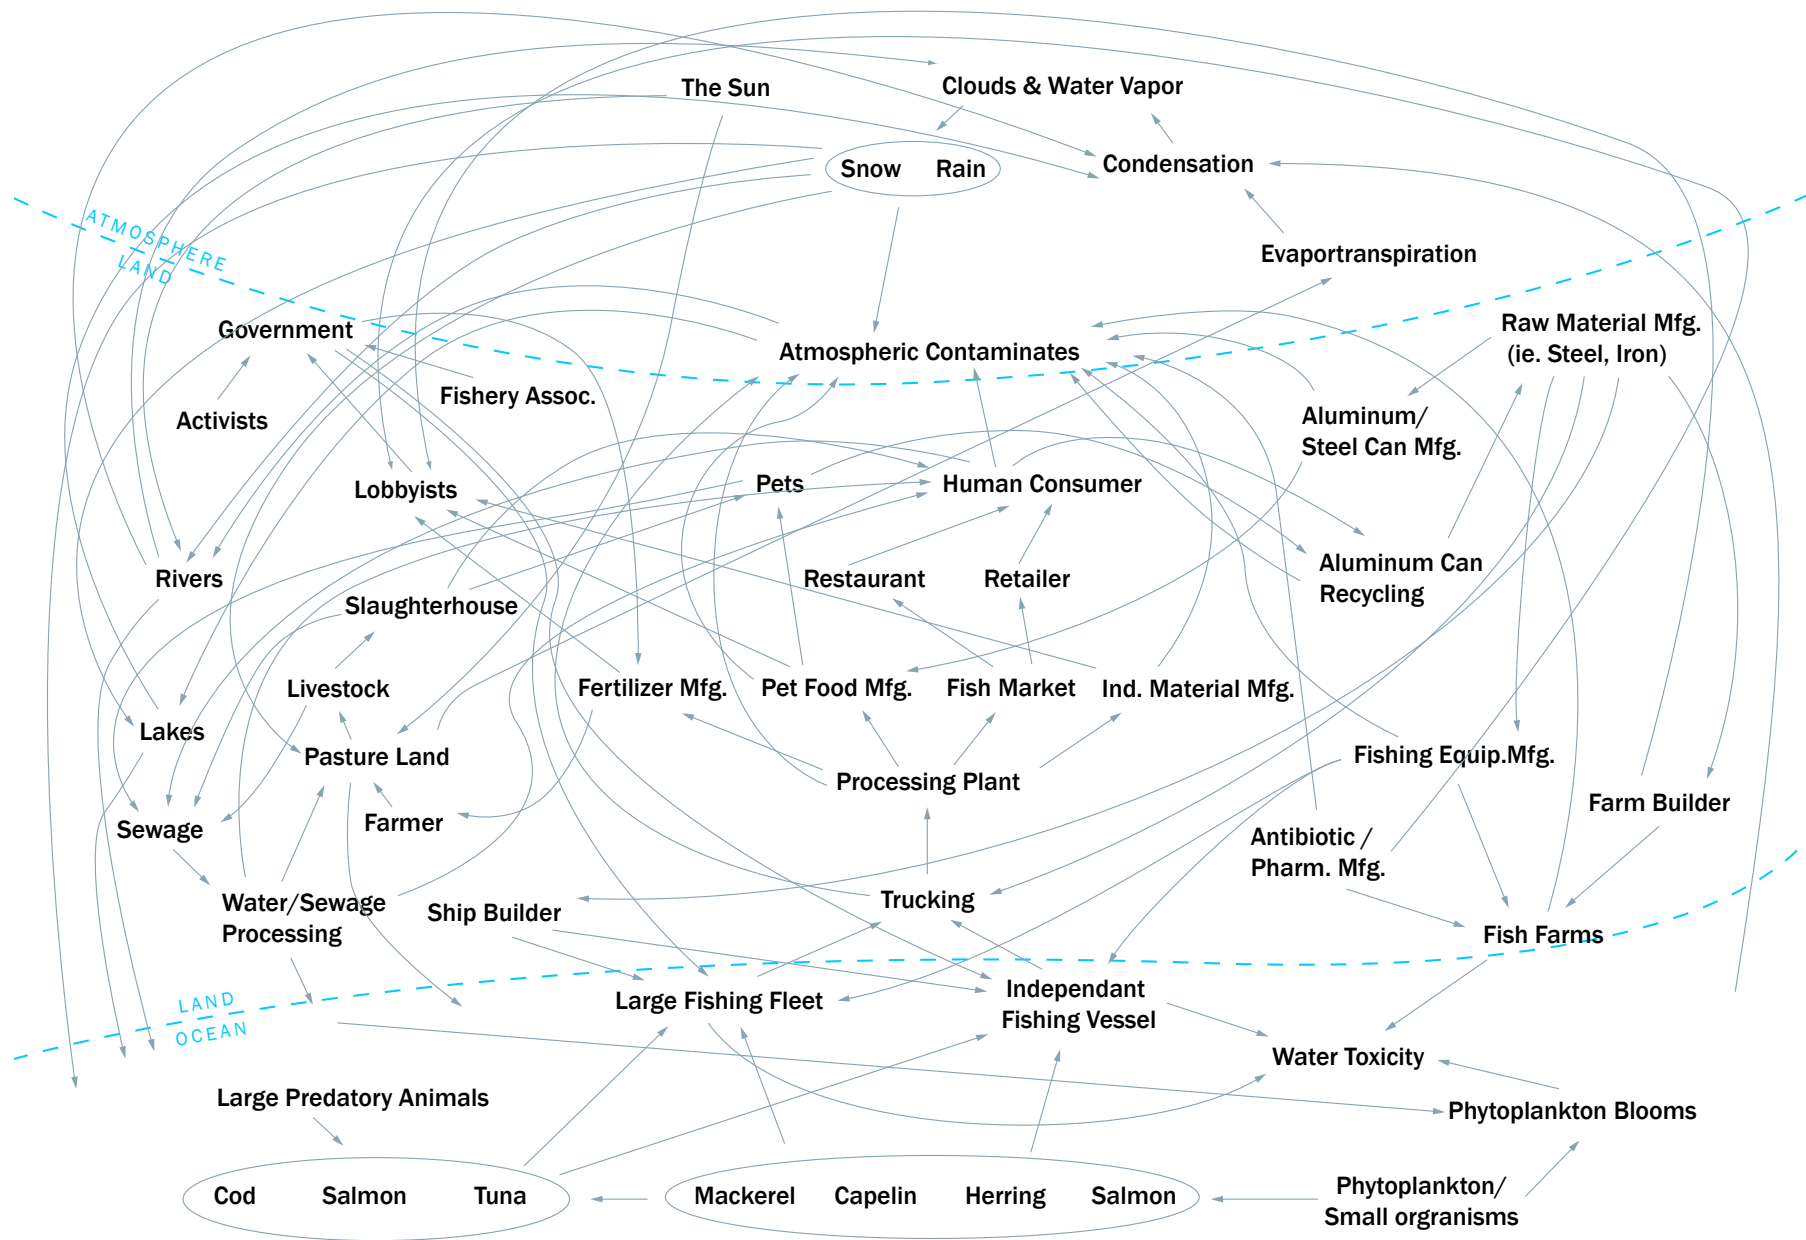

Paradigm Shift

from a *Sustainability* Model to *Resilience* Model

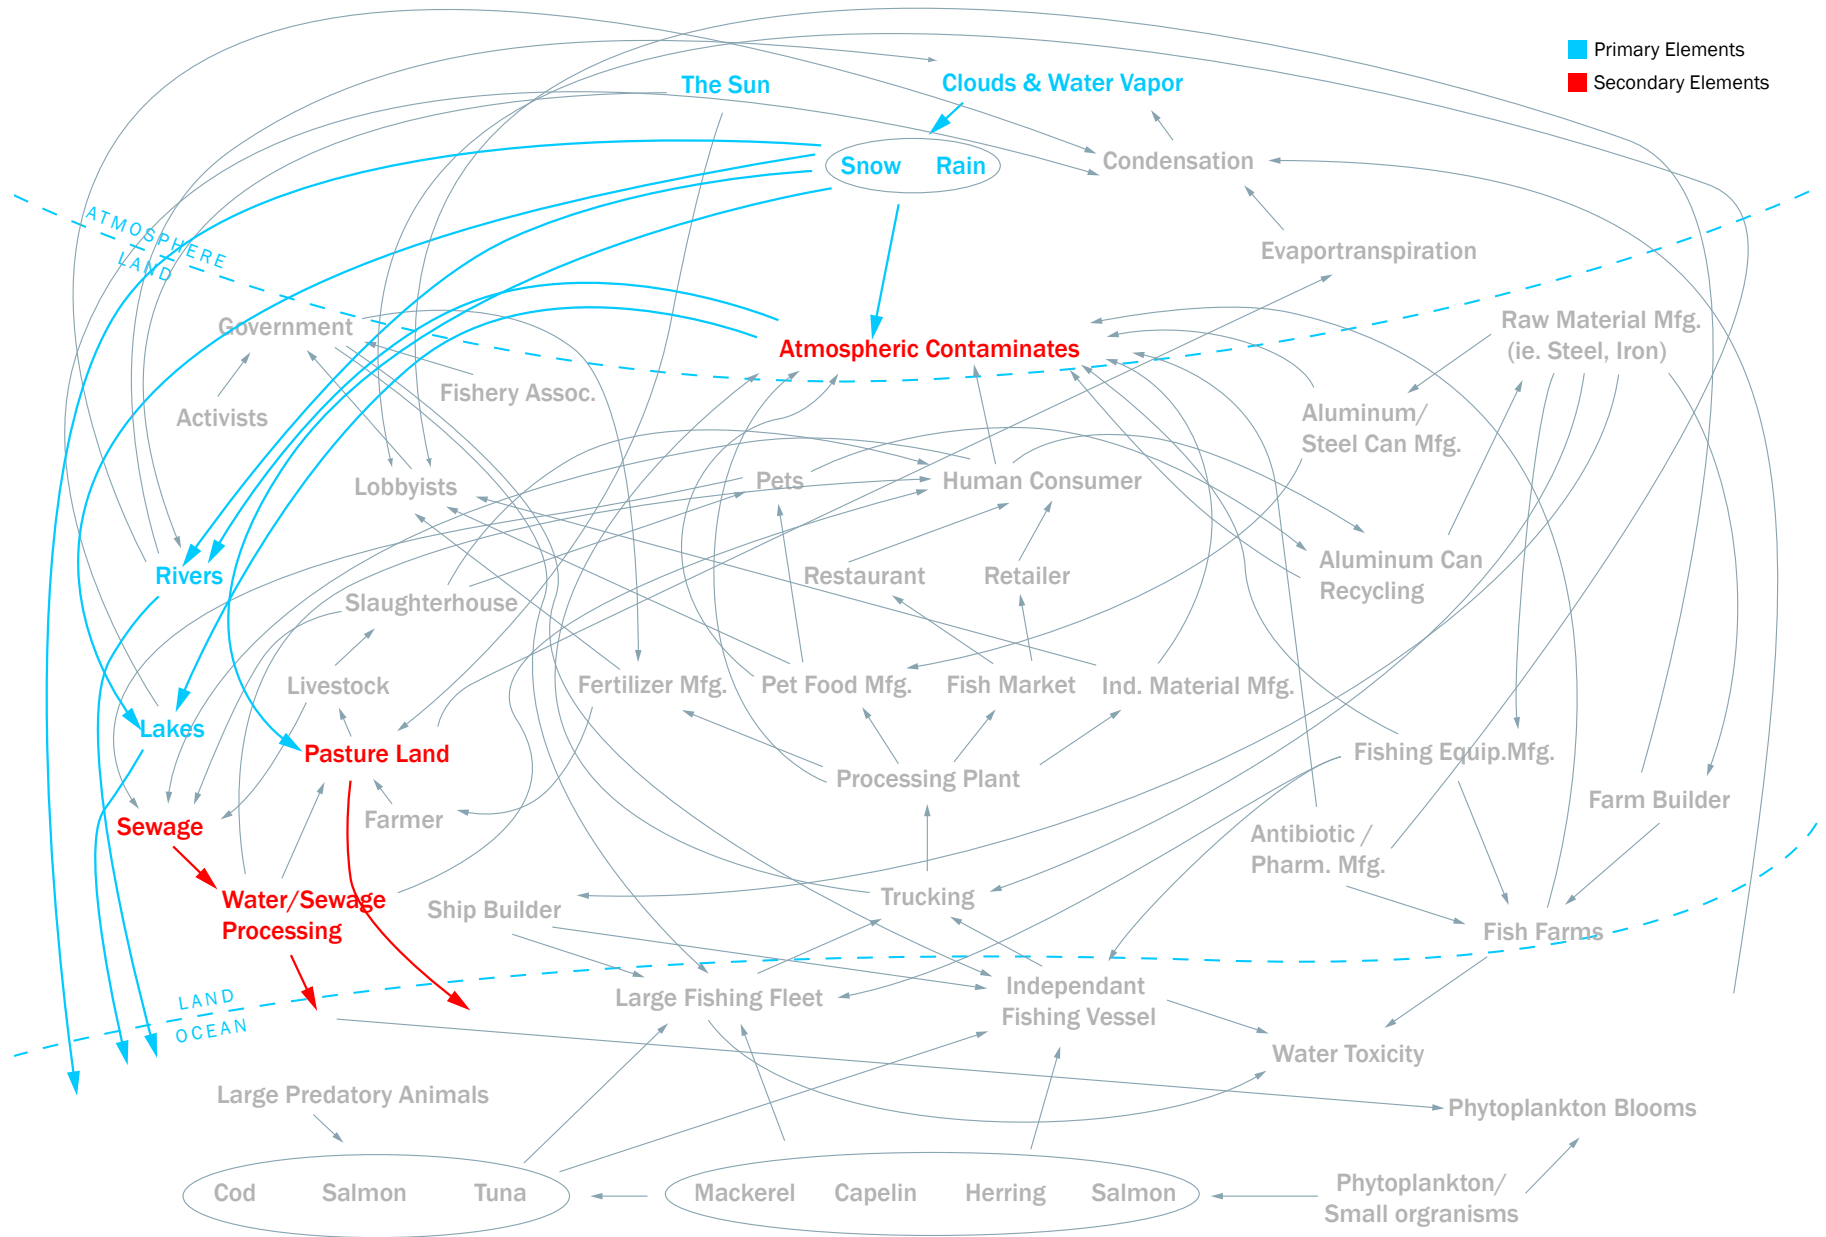

Resilience Model

Humans and fish are part of the same dynamic ecosystem. Our practices (fishing, conservation, pollution, etc.) are part of the actual ecosystem.

Systems related to fishing in the North East, U.S.
